

Project Plan: Recipe Manager Tracker

1. Project Overview

The Recipe Manager Tracker is a web application designed to help users manage and organize their favorite recipes effectively. This project aims to provide users with an intuitive interface to create, read, update, and delete recipes. The application will make it easy for users to track and manage their recipe collection.

2. Project Scope

The scope of the Recipe Manager Tracker includes the following core features:

- ★ A splash landing page with navigation options
- ★ CRUD functionality for recipes (Create, Read, Update, Delete)
- ★ Aesthetic design using Bootstrap
- ★ MongoDB integration for storing and managing recipes
- ★ Modal pop-ups for delete confirmation and enhanced user interaction

3. Target Audience

The application is designed for home cooks, chefs, and anyone looking to manage their recipe collection digitally. Basically anyone who wants a simple tool to organize their favorite recipes in one place.

4. Features Breakdown

- ★ Landing Page:
 - Main entry point with navigation options to view or add recipes.
- ★ Recipe List Page:
 - Displays all saved recipes with options to edit or delete each entry.
- ★ Add/Edit Recipe Forms:
 - Allows users to input recipe details such as name, category, preparation time, calories, and ingredients.
- ★ Delete Confirmation:
 - A confirmation modal appears before a recipe is deleted to prevent accidental deletions.
